Dear Mr. Tarr,

Thanks so much for the work you do to protect the environment. Trees are the lungs of the planet and protecting forests is so important to all life: so thank you!

I want to ask that there be more public hearings about on the information that was/is submitted by the ACP.

Clean energy, though unpopular by those who make a living off fossil fuels, is the energy of our time and the future and we must do everything in our power to implement those methods, for ourselves, our children and the environment.

Thanks so much and I hope you have a great day!

Kitty Lynn
